## SUMMARY

A web developer with more 1 year in software development. Willing to be an expert software engineer. Eager to learn and gain experience. Share in open source projects and contribute to the community.

A software engineer loves technical more than managerial not constrain to technology. open to learn new things and enhance technical skills.

Accept the Task even it's very difficult And Challenge myself until be solved successfully

So i am ready for using all my skills and capabilities to develop a better version of me.

I've studied two years track backend php laravel and i've skilled in creating CMS

dashboards and ecommerce dashboards dealing with Admin – Users and all interfaces with competitive database schema and high security.
